Sequoia Mental Health Services Selects Sequest's All-In-One Hosted Solution to Streamline Workflow Processes to Improve Claims Submissions

Lisle, IL (July 28, 2009) -- Sequest, a leading business solutions and software provider for the health and human services industry, announced Sequoia Mental Health Services has purchased Sequest's All-In-One Hosted TIER solution for their new electronic medical record (EMR). Sequoia Mental Health Services, Inc. (SMHS) is dedicated to providing services so that adults with mental health disabilities can live independently in the community and they plan to automate all aspects of their operation using Sequest's TIER® Solutions Platform. Their vision for the implementation of the software has a focus on improved quality through accurate documentation and better utilization of resources through enhanced workflow processes.

"In our search for an electronic behavioral health record and claims submission capabilities, we evaluated several products. We chose TIER because we realized we needed a system which was functional "out of the box" and can be readily customized by our in-house specialists." Said David Pump, Executive Director of Sequoia Mental Health Services. He went on to say "We chose the All-In-One Hosted service because an agency our size can not afford our own programmers or very much research and development. The "All-In-One" product where we use TIER on servers operated and maintained by Sequest, allows us to have the benefits of TIER without having to modify our network and hardware."

Sequest's CEO, Bill Connors, commented, "We are privileged to add Sequoia Mental Health Services to the growing number of partnerships we have and look forward to learning how better to assist their delivery of services."

+++++

About Sequoia Mental Health Services: Sequoia Mental Health Services (SMHS) is located in Beaverton and Hillsboro, Oregon. The agency is dedicated to providing assistance to people with long-term psychiatric, emotional and developmental impairments. The support provided is aimed at maximizing self-sufficiency and productivity and offered with compassion, integrity and a profound respect for each individual's strengths. At SMHS their goal is to surround the people they serve with a community that will engage, support and encourage them.
