***Lifeline Connections Chooses Sequest's TIER Solution for
Electronic Health Record Implementation***

Lisle, IL (January 29, 2010) -- Sequest, a leading business solutions and software provider for the health and human services industry, announced Lifeline Connections located in Vancouver, WA, has purchased Sequest's TIER Workflow and Billing solution to implement electronic health records and improve overall efficiencies in operation.. Lifeline Connections provides a broad range of treatment services including non-medical detoxification and chemical dependency intensive inpatient and outpatient treatment for adults and adolescents.

"Lifeline Connections is very excited about our new partnership with Sequest Technologies for our EHR needs, said Lynn Samuels, CEO of Lifeline connections. She went on to say: "Lifeline has gone through unprecedented growth in the last 5 years and it was apparent that we needed a more comprehensive solution to managing both our full continuum of clinical services as well as our administrative business processes. While no one product is a perfect fit right off the shelf, Sequest's extensive product development not only most closely matches our core business needs as they currently are but they offer the most flexible customization options of all the products we saw during our demonstration period. Many of the customizations can be done in house, by our existing IT staff, allowing us to quickly respond to our growth needs while saving us thousands of ongoing expense for custom development."

Lynn added: "Lifeline is Sequest's first client in Washington State and we have some unique reporting requirements to various, other data systems such as TARGET and ProviderOne. It is the goal of both Lifeline and Sequest to seamlessly integrate the transfer of data to those systems."

Sequest's CEO, Bill Connors, responded to Lifeline Connections selection of TIER by saying: "We are very pleased that Lifeline Connections selected TIER as their implementation of Electronic Health Records. As our first client in Washington State we share Lifeline's goals and feel their experience with multiple modalities as a provider in Washington will allow Sequest to get a foot in the door with additional providers as our solution is implemented"

About Lifeline Connections: Lifeline Connections is a private non-profit corporation that has been serving the Southwest Washington/Portland, Oregon communities since 1962.
