***Valley Forge Medical Center Chooses Sequest's TIER Solution
for Workflow and Billing***

Lisle, IL (January 29, 2010) -- Sequest, a leading business solutions and software provider for the health and human services industry, announced Valley Forge Medical Center & Hospital located in Norristown, PA, has purchased Sequest's TIER[®] Workflow and Billing solution to implement electronic health records and improve overall efficiencies in operation. Valley Forge Medical Center & Hospital provides innovative Addiction-Free Pain Management[®] detoxification and counseling along with a broad range of comprehensive treatments for adults with substance abuse and associated physical, social, and psychological disorders.

"Valley Forge Medical Center is very excited about our new partnership with Sequest Technologies for our EHR needs." said Gregg Slocum. "It was apparent that we needed a more comprehensive solution to managing both our full continuum of clinical services as well as our administrative business processes. While no one product is a perfect fit right off the shelf, Sequest's extensive product development not only most closely matches our core business needs as they currently are but they offer the most flexible customization options of all the products we saw during our demonstration period. Many of the customizations can be done in house, by our existing IT staff, allowing us to quickly respond to our growth needs while saving us thousands of ongoing expense for custom development."

Sequest's CEO, Bill Connors, responded to Valley Forge Medical Center's selection of TIER[®] by saying: "We are very pleased that Valley Forge Medical Center selected TIER[®] as their implementation of Electronic Health Records. Having a client with Valley Forge Medical Center's reputation is very exciting and we look forward to working with them to achieve their goals."

+++++

About Valley Forge Medical Center: Since 1973, Valley Forge Medical Center and Hospital has provided comprehensive treatment to adults with substance abuse and associated physical, social, and psychological disorders. VFMC is the first Addiction-Free Pain Management[®] Center of Excellence in the country addressing Chronic Pain and addiction. Their 86 bed facility is located in East Norriton, Montgomery County, Pennsylvania on a spacious, serene, wooded campus. Their professional staff provides high-quality treatment services and support to individuals and their families seeking freedom from addiction. Valley Forge Medical Center and Hospital is a licensed, general hospital approved by the Pennsylvania Department of Health, Bureau of Drug and Alcohol Programs and accredited by the Joint Commission on Accreditation for Healthcare Organizations (JCAHO).

About Sequest: Sequest Technologies, Inc., based in Lisle, IL is a recognized leader in innovative solutions and software products for the health and human services industry. Their expertise in streamlining financial, clinical and management processes greatly improves efficiencies and ultimately enhances patient care. The benefits of Sequest span a broad sector whose clients include mental health and substance abuse clinics, psychiatric hospitals and social services organizations.
