Bridgewell Selects Sequest’s TIER All-in-One Hosted Solution to Automate their Operation and Improve their Billing Process

Lisle, IL (March 26, 2010) - Sequest, a leading business solutions and software provider for the health and human services industry, announced Bridgewell has purchased Sequest’s TIER® All-in-One hosted solution for their new electronic environment. For more than 50 years, Bridgewell has been a leading provider of quality services to adults with disabilities on the North Shore with programs in 18 communities north of Boston. Bridgewell chose All-In-One to rapidly implement the TIER solution with plans to automate their operations. The All-in-One hosted solution will allow Bridgewell to focus on what they are best at-providing excellent service to individuals and families.

Bridgewell was impressed with TIER® and its flexibility to adapt to their needs without a lengthy implementation. “After struggling with another vendor’s implementation we have been really impressed with how robust the TIER solution is and its rapid implementation capability” stated Bob Stearns, CEO of Bridgewell. “In our experience, having a system designed by people who have worked in similar settings as ours gives us the confidence to know the system will fit our needs.”

Sequest’s CEO, Bill Connors, commented, “We are privileged to add Bridgewell to the growing number of partnerships we have and look forward to working with the Bridgewell team to achieve their goals.”

+++++

About Bridgewell: Bridgewell offers a wide range of comprehensive services for people with disabilities and other life challenges. By providing a continuum of quality services and community education, they tackle issues and barriers facing people with disabilities. Their service model focuses on the abilities of individuals and approaches service delivery as a partnership, respecting the needs and desires of each individual. This person-centered approach allows them to support and respect the people they serve, as well as to foster independence.

About Sequest: Sequest Technologies, Inc., based in Lisle, IL, is a recognized leader in innovative solutions and software products for the health and human services industry. Their expertise in streamlining financial, clinical and management processes greatly improves efficiencies and ultimately enhances patient care. The benefits of Sequest span a broad sector whose clients include mental health and substance abuse clinics, psychiatric hospitals and social services organizations. With over 25 years in the industry, Sequest is highly respected by both CEOs and practitioners alike. Today, Sequest has become the go-to company for innovative solutions in the field of healthcare, along with its customer-centric approach. Sequest develops more than just Electronic Health Record Systems for providers. This forward-thinking company continues to create dynamic, new connections between providers and patients that are helping transform practices and the industry as a whole.
