Sequest’s TIER® Solution is Compatible with Part 599 of Title 14 NYCRR for the State of New York Regulations and Guidelines.

Lisle, IL (August 25, 2011) -- Sequest, a leading business solutions and software provider for the health and human services industry, announced that Sequest’s TIER® Solution is compatible with the State of New York’s clinic regulations for Ambulatory Patient Groups(APG). The Office of Mental Health and Office of Alcohol and Substance Abuse have developed APG’s for Medicaid reimbursement to gain a more seamless billing process in New York State. The Sequest Enterprise-wide application TIER® has gone live in NY with this new functionality that adheres to required APG functionality with Part 599 of Title 14 NYCRR.

“Sequest is a pleasure to work with-their staff are reliable and ALWAYS go above and beyond. Our Project Manager knew the pressure we were under and that if he did not get the APG billing implemented, the financial stability of the Recovery Net agencies would be in jeopardy. Over the past month he has continued to support us as we encounter billing issues. He is accessible and responds quickly to our needs (even when out of the office). We are so grateful that he was part of this implementation.” - Mary Elizabeth Laduca, Huther-Doyle.

+++++

About Ambulatory Patient Groups: A payment system that pays a fixed price for certain types of outpatient procedures. This classification system for outpatient services reimbursement was

developed for the American Medicare service by the Health Care Financing Administration and adopted by the Office of Mental Health (OMH) in the state of New York.

About Huther-Doyle: Huther-Doyle is an affiliate agency of Recovery Net, in which the primary focus is substance abuse treatment. Located in Rochester, NY, Huther-Doyle supports individuals from all walks of life to become healthier, contributing citizens and to conquer their personal addictions. Huther-Doyle's mission is to provide culturally appropriate, high-quality addiction recovery and physical health services to help individuals make positive changes in their lives with a vision for a safer, healthier community through reduced incidence of addiction.

About Sequest: Sequest Technologies, Inc., based in Lisle, IL, is a recognized leader in innovative solutions and software products for the health and human services industry.
